D-20

Plastic cement
1 kg, 4 kg, 10 kg and 20 kg

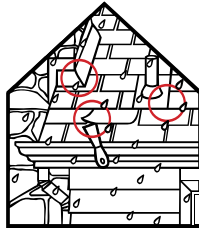

- > This asphalt and fibre plastic cement is formulated for multipurpose use. It is specially manufactured to stop leaks and repair deteriorated areas on asphaltic roofs. Exterior use only

D-25

Wet surface plastic cement
1 kg, 4 kg, 10 kg and 20 kg

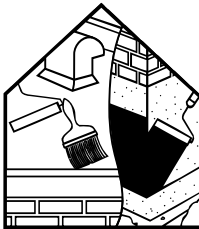

- > This plastic cement for wet surfaces is asphalt and fibre formulated for multipurpose use. It is specially manufactured to stop leaks and repair deteriorated areas on asphaltic roofs. Exterior use only

D-30

Non-fibre roof and foundation coating
3,78 l and 18,9 l

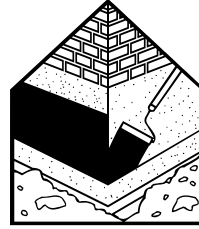

- > This liquid non-fibre roof and foundation coatings formulated with liquefied asphalt to be applied to waterproof concrete and masonry foundations and old roofs. It is used to waterproof on well drained roof (no ponding water) of felt and asphalt roofing as well as asphalt shingle roofing. Exterior use only

D-35

Rubberized foundation coating
19 l

- > This rubberized foundation coating is formulated with special ingredients to waterproof concrete and masonry foundations. Exterior use only

D-40

Fibrated roof coating
3,78 l and 18,9 l

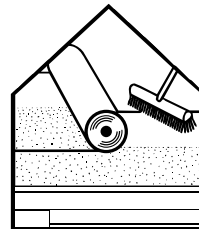

- > This fibrated roof coating formulated with asphalt and fibre to be applied over asphaltic roofs can be used on well drained roof (no ponding water). It is specially formulated to protect and waterproof old roofs. Exterior use only

D-50

N.I.S. adhesive
3,78 l and 18,9 l

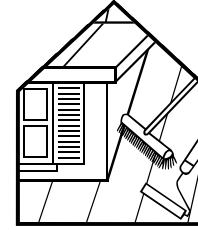

- > This N.I.S. adhesive is composed of liquid asphalt and mineral fibres. It is used in cold process application with asphalt felt and N.I.S. roofing. Do not use with auto-adhesive shingle. Exterior use only

D-90

Aluminum asphaltic roof coating
3,78 l and 18,9 l

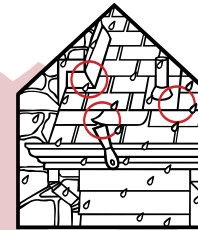

- > This aluminum color coating is composed of selected asphalt, mineral fibre and aluminum. It gives to metallic roof, a protective, decorative and reflective finish with excellent weathering characteristics. It can be used on well drained surfaces (no ponding water). Exterior use only

D-200

Plastic cement - all seasons
4 kg, 10 kg and 20 kg

- > Easy to apply all seasons. This excellent plastic cement for wet or dry surfaces contains asphalt and fibres specially selected for multipurpose use. It is used to stop leaks and repair deteriorated areas on asphaltic roofs. Exterior use only

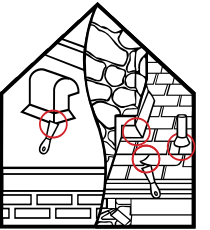

Sealflex

Rubberized plastic cement
4 kg and 20 kg

- > This excellent wet or dry surfaces rubberized plastic cement contains elastomers and fibers specially selected for multipurpose use, and

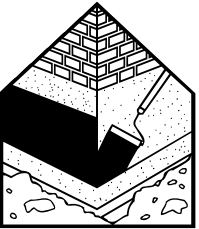

special additives provide excellent adherence to wet surfaces to give a uniform coat without blisters. It is used to repair leaks and weathered surfaces of asphalt roofs. Exterior use only

Sealflex

Rubberized foundation coating
3,78 l and 18,9 l

- > This excellent rubberized foundation coating for wet or dry surfaces is formulated with special ingredients to waterproof concrete and masonry foundations. Exterior use only

Sealflex

Rubberized fibrated roof coating
3,78 l and 20 l

- > This excellent rubberized fibrated roof coating contains elastomers and fibers specially selected to protect and waterproof roofs. It can be applied on wet or dry surfaces. It is used on well drained roofs (no ponding water) of felt and asphalt roofing as well as asphalt shingle roofing. Exterior use only
