

PLASTIC CEMENT

THIROCO's Plastic Cement is a professional quality asphalt product with superior and durable yield.

It insures peace of mind by providing a 10 years warranty protection.

Multipurpose, it is mainly used to stop leaks and repair deteriorated areas on roofs and foundations. It stays flexible, water and sun proof and even acid resistant. Products par excellence for asphalt shingles pasting.

With Winter Grade Plastic Cement, THIROCO faces up cold season by providing an excellent formulation which stays malleable and easy to apply even at low temperature.

THIROCO's Plastic Cement meet all requirements of Canadian and USA industry standards (CAN/CGSB, ASTM, CSA).
